-2-

6. Most of the work is done with older materials of inferior quality, of which there is an adequate supply. The factory fulfilled the 5-year plan about 85%. Working morale is not particularly good.
7. A number of the employees from other districts, unmarried ones, are housed in the PS (Pohranicni Straz) barracks, about 100 meters to the west of the factory enclosure. The barracks consist of about 20 to 30 wooden huts. Some PS personnel also live here.

Legend to the sketch

1. Wall, $2\frac{1}{2}$ m. high, surrounding the plant, which covers an area 300 x 250 m.
2. Entrance from the state highway.
3. Gatekeeper's lodge, brick, 30 x 30 m., which also contains a bath and washrooms.
4. Baths and washrooms.
5. Washrooms.
6. Factory administration, three-story building, 20 x 20 m. Contains offices of the management, personnel department, works council, CSM and C.P..
7. Production hall, reinforced concrete, 80 x 40 meters, divided into two parts:
 - a. The southern part, nearer the road, contains the rolling shop for rubber, equipped with calender machines and mixers.
 - b. In the northern part, is the rubber heels department equipped with presses and cutters.
8. Laboratory.
9. Gumming shop, where impregnated rubber sheeting for military purposes and rubber solution are made.
10. Technical department, in which smaller rubber articles, such as thermos flasks, rubber aprons, valves of all kinds and rubber bands of small sizes are made.
11. Hydraulic department; four hydraulic presses produce compressed air which drives all the machines. Underground pipes lead from this department to all production halls. Most of the presses are driven by compressed air.
12. Shipping department. (Nos. 8 to 12 above are in a reinforced concrete building, 70 x 40 meters, divided into 5 parts.)
13. Offices.
14. Dental clinic.
15. Works' doctor and first aid (Nos 13, 14 and 15 are in a one-story, brick 40 x 25 m. building.)
16. Stores of rubber waste, wooden building, 20 x 20 meters.
17. Joiners' shop, brick building, 20 x 15 meters
18. Railroad siding, leading to Petrzalka stop.
19. Narrow-gauge track for transport of coal to the boilerhouse.
20. Boilerhouse, chimney 30 meters high.
21. Mechanical workshop; electric machine tools.
